## Welcome to our Beta Test!

We would like to thank each of you who participated in our Alpha Test. For those who are new to urbanfetch, we offer you our warmest welcome!

Here's how the BETA TEST works:

1. Deliveries are available every night from **5pm-10pm**.
2. Delivery and pickup are free.
3. All orders come with a free ½ pound bag of urbanfetch cookies baked fresh daily.
4. **BOOKS** are 50% off.
5. **MUSIC** is 50% off.
6. **DVDs** for sale are 50% off.
7. **VHS** and **DVD** rentals are 50% off.
8. **SNACKS** are 50% off.
9. **Important:** While we continue to develop our systems during this testing period, the site will permit no more than **750 orders** per night. Each night, a notice will appear on the site when the ordering limit has been reached. Note: Pre-Orders can be made at any time and will count towards the **750 order** limit, so feel free to pre-order when it's convient for you and schedule delivery between 5pm-10pm. We look forward to increasing the order limit as we move through the testing period.
10. If you have any questions, please feel free to call our customer service department at (212) 981-3500.

Please keep your comments coming to [feedback@urbanfetch.com](mailto:feedback@urbanfetch.com). Your input is invaluable. Also, please carefully check this front page each night before you enter the main site as our various BETA TEST promotions will change.

Our Price: \$294.00  
You Save: \$31.00 (10%)

### MOVIE SPOTLIGHT

☐ ☐ add to cart

#### Stigmata

Frankie Paige (Patricia Arquette) has absolutely no faith in God—until now. Everything has changed. Frankie has begun to suffer from Stigmata—the living wounds of the crucified Christ. Frankie's miraculous bleeding comes to the attention of the Vatican's top investigator, Father Kiernan (Gabriel Byrne). Kiernan slowly begins questioning his own faith when Cardinal Houseman discovers that Frankie is actually channeling an extraordinary and provocative message that could destroy the ...more

## BOOK SPOTLIGHT ☐

☐ ☐ add to cart

### A Heartbreaking Work of Staggering

Genius, by Dave Eggers

A Heartbreaking Work of Staggering Genius is the astoundingly brilliant memoir by Dave Eggers, the founding editor of the satirical, now defunct, magazine MIGHT. With it's 20-page acknowledgments section, "Rules And Suggestions For The Enjoyment Of This Book," and it's hilarious preface, A.H.W.O.S.G. is indeed "staggering." The book finds a 21-year-old Eggers dealing with the loss of both parents to cancer within just weeks of each other and facing the challenges of raising his 8-year-old...more

### Assorted Bagels - 1/2 dozen

In the H&H East Variety Pack, we have included a classic mix of many different bagels. With 2 Plain, 1 Cinnamon-Raisin, 1 Poppy, 1 Sesame, and 1 Everything, there is a bagel for everyone in this bag! 6 bagels in all.

## DINNER SPOTLIGHT ☐

### Luxurious Lobster Dinner for Two

Famous for their "quick freezing" technology - cooking and freezing the world's finest lobsters minutes after being pulled from the icy Maine waters - the Fulton Street Fish Market's wonderful lobsters maintain an excellent taste and texture for up to nine months. In fact, they are so good that in a 1995 test conducted by the University of Maine, 20 five-star Executive Chefs from around the U.S. could not tell they had been frozen! This easy-to-prepare feast features savory crab cakes, [...more](#)

TEXT:

Online grocery competition is the latest battle in the war over the last mile.

Naysayers used to scoff at the idea of buying food online. "Ordering a pizza online is harder than picking up the telephone," they'd say. "And who'd want to do such a ridiculous thing, anyway?" But online retailers have proven these pundits were just looking at the order process the wrong way.

Online shopping isn't just about placing an order through your PC, nor is it just about price. It's about convenience and availability. Price isn't the only thing that draws customers to Amazon.com; being able to find products you can't find at your local store is just as important. Online car-buying services are more about taking the hassle out of haggle, and PayMyBills.com is about freeing weary consumers of the drudgery of check writing.

The same advantages apply to online food shopping. Just when you thought takeout couldn't get any easier, Food.com makes it even more convenient by offering menu comparisons and **schedules** that let you order in advance or set up **recurring deliveries**. If you live in Boston, New York City, San Francisco, Seattle, or Washington, D.C., you can log on to Kozmo.com and its army of delivery people will bring you anything from videos to Krispy Kreme doughnuts in less than an hour.

The ability to save people time is what has investors so enamored of Bay Area IPO Webvan. The online grocery newcomer plans to expand into 26 markets around the country during the next two years. Another similarly aggressive Bay Area service is HomeGrocer. Launched by Borders founder Louis Borders, HomeGrocer is also in Portland, Ore., and Seattle, and has attracted such investors as Amazon.com, Netscape cofounder Jim Barksdale, and Martha Stewart. Future locations could include Boston, New York City, and other parts of the West Coast.

The premise for many of the new services is similar to that of online bookselling - warehouses are cheaper than storefronts. But the logistics are much more complex. On top of the delivery-timing issue, these companies have to deal with perishable products and health regulations. But the spoils, if you'll pardon the pun, go far beyond groceries. These companies' sites spell out a host of future services, including health products, pet supplies, stamp delivery, photo processing, shoe repair, dry cleaning, package-delivery scheduling, video rental, and even bottle and can redemption.

With stakes like these, it's no wonder Webvan invested \$1 billion with the Bechtel Group to build distribution centers. Or that online grocery pioneer Peapod, which uses local supermarkets as its warehouses, has partnered with distribution-logistics firm The McLane Group to streamline its services in Austin, Boston, Chicago, Columbus, Dallas/Fort Worth, Houston, Long Island, and San Jose.

HomeGrocer, Peapod, and Webvan require you to choose "delivery windows" to receive perishable food in person. But alternatives are already cropping up. Peapod and NetGrocer will ship you nonperishable food by FedEx and UPS.

The more radical ShopLink.com and Streamline.com will actually install a refrigerator in your garage with keypad access for the driver. ShopLink.com also offers a cheaper dropoff in insulated containers.

#### Price matters

Online grocery services are targeting wealthy suburbs first. But that doesn't mean they're not sharply priced. Most services advertise that their prices are equal to or lower than those of your local grocery store. Only Peapod accepts manufacturer coupons, though. Many services charge delivery fees of \$7.50 to \$9.95, but they'll waive them on orders of \$50 or more. ShopLink.com and Streamline.com are geared toward regular weekly deliveries, and both have monthly fees ranging from \$25 to \$39. I just signed up for a six-month free trial with ShopLink.com, which began serving the New York

area last month. At press time, Streamline.com was offering two months free and \$50 off your first order.

Because there's a price angle to all this, it's no surprise that Priceline.com has gotten into the grocery business. You can already hear William Shatner's voice in the New York metro area, now that the "name your price" people have partnered with a company called WebHouse Club. Priceline.com cleverly avoids the logistics issues by leaving the traditional grocery-shopping model pretty much intact. You name your price online, find out within a minute which bids were accepted, and after making an upfront credit-card payment, you go to a participating grocery store and swipe your Priceline.com card through the debit-card terminal to register the sale.

There are some catches, though. The service costs \$3 for any given month you make bids that are accepted, regardless of how much money you save. (The first 90 days are free.) Orders are valid for only 90 days; if you don't find the goods within that time, you forfeit your money. If you want to use a store coupon or you find a better price at the store than you got online, you receive House Dollars rather than real money. House Dollars get you selected items for half price.

I'm still debating the pitfalls of this system. As for the others, there are vast differences in selection and interface among the services, so there's no guarantee that the one available in your town will suit your needs. In addition, rarely will a service offer all the choices you'll find at a real supermarket. But once these companies iron out the kinks, it sure will be a pleasure to spend a shopping-free weekend.

TEXT:

HOUSTON--(BUSINESS WIRE)--Dec. 7, 1999--

Growth in E-Commerce and Heightened Demand for Immediate Response  
Fuels Greater Need for Reliable and Full Service Logistics Solutions

United Shipping & Technology (US&T; Nasdaq:USHP) today announced the initial results of its planned, strategic restructuring effort following its September 27, 1999 acquisition of Corporate Express Delivery Systems (CEDS).

As the largest provider of customized delivery solutions for same-day, time-critical shipping and e-commerce distribution in North America, US&T is poised to take advantage of the rapidly increasing demand for B2B and B2C same-day delivery services across the United States.

The two major realignment efforts currently underway include a change in the basic organizational structure of the company and the decentralization of the sales force. The restructuring effort includes the formation of a new Business Development group, to be headed up by Lonnie Bane, Sr. VP of Business Development and Support Services. This group will work hand-in-hand with the field sales force to continue to develop and maintain business relationships that can be extended on a national scale. In addition, the sales and marketing functions are being decentralized into three existing geographic regions (Eastern, South Central and Western), which will enable US&T and CEDS to streamline the sales process and quicken their response time to customers. This, in turn, will allow the company to achieve its goal of increased customer intimacy, forming closer relationships to its local customers.

"Our ultimate goal is to become the branded global leader in same-day delivery solutions and to achieve this goal we are committed to providing a higher level of customer service," stated Peter Lytle, Chairman and CEO of US&T. "By focusing on restructuring the company from the inside out and making our company as effective and efficient as possible, we will be better prepared to take advantage of the increasing demand for immediate delivery that will occur as the pace of e-business continues to escalate."

According to a study conducted by the Parthenon Group, a transportation consulting firm, the annual domestic same-day delivery service market is estimated to be approximately \$15 billion with an annual growth rate of 5.5 percent. At present, the industry is very fragmented, consisting of over 10,000 regional delivery companies with limited service offerings. As the market leader, US&T has both the technological know-how and an extensive infrastructure that has allowed the company to not only maintain its leadership position, but also to expand its hold on the marketplace. Through an aggressive acquisition strategy and a commitment to advance technological initiatives through the company's technology unit, the Intelligent Kiosk Company (IQ K), US&T is poised to take full advantage of the increasing demand for scheduled same-day and on-demand delivery.

US&T is the largest national same-day delivery company and provides customized transportation services to key Fortune 500 companies and others across several vertical industries including: financial institutions; healthcare; petrochemical; computers and electronics; and e-commerce. Among the company's customers are Bank of America, Fleet Bank, McKesson Corporation, BP Amoco, Dow Chemical, and Maintenance Warehouse/Home Depot.

US&T is also the parent of IQK, the company's technology division. IQK manages US&T's proprietary lines of advanced technology for all aspects of shipping, including increased access and customer service via its interactive shipping and **Internet** document delivery system. i-Courier, the company's **Internet** based delivery service, offers customers low-cost alternatives to traditional document delivery services.

Already a leader in same-day e-commerce shipping, US&T's mission is

to grow market share by providing a higher level of service and logistical support to customers through the use of advanced technology, while at the same time bringing a new dimension to interactive commerce and information retrieval. For more information, visit the company's web site at [www.u-s-t.com](http://www.u-s-t.com) -0-

## United Shipping & Technology

### FACT SHEET

Company Name: United Shipping & Technology (US&T; Nasdaq:USHP)

Operating Entity: Corporate Express Delivery Systems (CEDS)

Management: Peter Lytle, Chairman and CEO, US&T  
Marshall T. Masko, Vice Chairman, US&T  
Timothy G. Becker, CFO, US&T  
Burt Merical, President and COO, CEDS

US&T Headquarters: 9850 51st Avenue North  
Suite 110  
Minneapolis, MN 55422

CEDS Headquarters: 11 Greenway Plaza  
Suite 250  
Houston, TX 77046

Overview: In September of 1999, US&T acquired Corporate Express Delivery Systems (CEDS). Integrating US&T's technology with CEDS' extensive infrastructure and impressive "on-time" delivery rate, US&T is the largest same-day delivery company in the United States. The company develops custom delivery solutions for same-day, time-critical shipping and e-commerce distribution. US&T's presence as the largest same-day delivery company has secured strong bonds with manufacturers and retailers striving to speed up the pace of delivery and meet the needs of e-commerce customers. Industry analysts at Forrester Research estimated that B2B e-commerce will hit \$109 billion in 1999 and rise to a total of \$1.3 trillion by 2003, with an annual growth rate of 99%. This represents a huge opportunity for US&T to expand its business and capitalize on this rapidly growing market.

Operating Facilities: Over 200 local offices in the top 100 Metropolitan areas in the U.S.

### Ground Services

- Provide delivery services from approximately 190 locations and operate in 80 of the top 100 Market Service Areas (MSAs) as well as numerous secondary markets.
- Four main businesses:

that  
and  
1. **Scheduled Delivery** : same-day, time-sensitive deliveries are recurring in nature. Pick - up and delivery routes are pre-defined based on the needs of the customers. (e.g. financial institutions and service and repair companies).

2. **On-Demand Delivery**: Local and inter-city immediate pick-up and delivery (1 hour, 2-4 hour and 4+ hour), (e.g. hospitals, law offices, technology companies).

3. **Distribution Services**: Same-day delivery for the home and time-sensitive local deliveries that require intermediate handling or sorting prior to delivery to multiple locations. (e.g. pharmaceuticals, retailers, manufacturers).

4. **Integrated Supply**: Full logistics management and replenishment

responsibility of non-critical inventories for large multi-sited customers (also called supply-chain management).

#### Operations Organization

- Three separate regions:
- Western Region President: Chip Winton (Houston)
- South Central Region President: Vic Serri (Houston)
- Eastern Region President: Jay Waldman (New York City)

#### Air Services

- Three main brand names:
- Tricor
- Air Courier Dispatch
- Midnite Express
- The "air group" provides same-day scheduled and on-demand delivery :
- Same-Day Scheduled Air Delivery Services: Provided for time-sensitive deliveries that are recurring in nature. Pick-up and delivery routes are pre-defined based on the needs of the customer. (e.g. financial institutions for delivery of non-negotiable instruments, primarily canceled checks)
- Next Flight Available/On-Demand Delivery: Local same-day delivery whereby messengers or drivers respond to a customer's request for immediate pick-up and delivery. (e.g. entertainment firms, shipping production materials including film footage and music, investment banks, advertising agencies, hospitals shipping human organs and manufacturing firms requiring parts for idled machines).
- Western Region President, Chip Winton, oversees the CEDS air businesses.
- Provides delivery services from 40 locations.

Corporate Strategy: US&T provides a higher level of service and logistical support to customers through the use of advanced technology, while at the same time bringing a new dimension to interactive commerce and information retrieval. The same-day delivery service market is estimated at \$15 billion with an annual growth rate of 5.5 percent (The Parthenon Group). Through a combined strategy of focusing on technology and franchising, US&T is poised to become the 'icon' of the industry by providing the fastest, most reliable full service logistics solutions available.

**Bayer Corp. Selects Lilly Software's VISUAL APS; Lilly's Patented  
Scheduling Technology.**

Business Wire, p1050

Oct 6, 1999

Language: English Record Type: Fulltext

Document Type: Newswire; Trade

Word Count: 579

TEXT:

HAMPTON, N.H.--(BUSINESS WIRE)--Oct. 6, 1999--

Bayer Corporation's Diagnostics Division of Mishawaka, Indiana, has selected Lilly Software's VISUAL APS(R) advanced planning and scheduling system. Bayer Diagnostics is a make-to-stock manufacturer of point-of-care and self-testing medical equipment including blood- and urine-testing equipment.

"Bayer knew we could deliver an APS solution quickly," said Michael Lilly, a VP and Product Manager at Lilly Software. "Also, the fact that we have 2000 sites that are using essentially the same software made them comfortable with the choice." VISUAL APS is an offshoot of Lilly Software's VISUAL Manufacturing ERP system, which has a base of more than 2,000+ installations worldwide.

"We were attracted to VISUAL APS because of its ability to not only solve our forecast but to apply finite scheduling logic to constrained resources," said Bayer's Supervisor of Material Control Bill Gates. "In short, it gives us real-world scheduling."

The Lilly Software/Bayer implementation team will conduct an in-house pilot program by scheduling the production of Bayer's new Glucometer(R) DEX(R) Diabetes Care System. The team will create sample schedules, with great scrutiny given to the integrity of the results. The aim is to hone the software to create realistic and achievable production schedules at the Bayer facility. The team projects a "go-live" date of November 1.

VISUAL APS is unique in featuring concurrent scheduling of resources and materials, a technology for which Lilly received the US Patent in July '98. Thus, Lilly Software's patented concurrent scheduling system can be integrated with other ERP systems.

Concurrent finite scheduling takes both resource and material constraints into account. According to industry analysts AMR, such simultaneous consideration of material and plant resources is a "must have" for any APS system.

Lilly's concurrent scheduling/APS feature was wildly successful at several installations, with customers reporting throughput increases of up to 42%. Lilly Software interviewed those customers and back-engineered both the APS system and a strategy to maximize a company's throughput using the system. Called Common Sense Throughput for CEOs(TM).. Among other features, Lilly's APS system includes:

- Backwards and Forwards Scheduling
- Scheduling of a complex multi-level bill of manufacture as a single work order to a single customer due date
- Multiple "what if" schedules with profitability, cash flow and on-time delivery data.
- Identification of material and resource bottlenecks
- Full scheduling audit trail to indicate opportunities for improvement.

Moreover, VISUAL APS joins the narrow field of APS systems available for the IBM AS/400, a leading choice of platforms among small- and midrange manufacturers.

About Lilly Software Associates

Lilly Software Associates, Inc. (LSA) provides a complete line of supply chain management solutions. These include VISUAL Manufacturing(R), VISUAL Distribution(TM), VISUAL APS (TM) (Advanced Planning and Scheduling), and VISUAL Quality(R) for engineer-to-order, make-to-order, assemble-to-order, make-to-stock, and mixed mode manufacturers. Lilly's flagship product, VISUAL Manufacturing(R) is a fully integrated Windows-based Enterprise Resource Planning (ERP), Manufacturing Execution System (MES), and Advanced Planning and Scheduling (APS) software system,

with over 2,000 installations worldwide. VISUAL Manufacturing runs on Windows NT, UNIX or Novell, using SQLBase, Microsoft SQLServer, ORACLE or DB2-400 relational databases, and is certified for both AS/400e and Netfinity servers. Lilly Software was ranked by Inc. Magazine as #102 of the 500 fastest-growing companies in the US in 1998. Lilly Software was also named to Inbound Logistics Top 100 LIT Providers of 1999, Manufacturing Systems' Top 100 Software Companies, and Software Magazine's Top 500. Visit the Lilly web page at [www.lillysoftware.com](http://www.lillysoftware.com).
